## **General Information**

### Target Audience

Neurologic, orthopaedic, pediatric and trauma surgeons, fellows and residents, nurses, PAs, OR techs, intraoperative monitoring techs involved with spine surgery procedures, and hospital personnel responsible for patient safety and quality control.

### Purpose of Program

To provide participants with a comprehensive and interactive update on the latest tools, guidelines and checklists that are being utilized to enhance safety in the intra and post operative stages of spine surgery procedures, in infant, pediatric, adolescent, adult and elderly patients.

### Educational Objectives

At the conclusion of this activity, participants should be better able to:

- Discuss best practices and the latest advances for safety during the pre, intra, and post-surgical stages of spine surgery.

### Claiming CME

Instructions for claiming CME credit will be sent to all live webinar attendees via email at the conclusion of the event.

### Joint Providership

This program is jointly provided by Medical Education Resources, Inc. and the Safety in Spine Surgery Project.

### Accreditation Statement

In support of improving patient care, this activity has been planned and implemented by Medical Education Resources (MER) and the Safety in Spine Surgery Project. MER is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE) and the American Nurses Credentialing Center (ANCC) to provide continuing education for the healthcare team.

**JOINTLY ACCREDITED PROVIDER™**  
**INTERPROFESSIONAL CONTINUING EDUCATION**

### Physician Credit

Medical Education Resources designates this online activity for a maximum of 2.0 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

### Off-Label Uses

It should be noted that specific medicines and medical devices discussed at this meeting may not yet be specifically cleared by the FDA for use in the United States. It is emphasized that package inserts must be referred to for labeling limitations for products used in the United States.

### Disclaimer

The content and views presented in this educational activity are those of the authors and do not necessarily reflect those of Medical Education Resources, the Safety in Spine Surgery Project, BroadWater, and/or supporting companies. The authors have disclosed if there is any discussion of published and/or investigational uses of agents that are not indicated by the FDA in their presentations. The opinions expressed in this educational activity are those of the faculty and do not necessarily represent the views of Medical Education Resources, the Safety in Spine Surgery Project, BroadWater, and/or supporting companies. Before prescribing any medicine, primary references and full prescribing information should be consulted. Any procedures, medications, or other courses of diagnosis or treatment discussed or suggested in this activity should not be used by clinicians without evaluation of their patient's conditions and possible contraindications or dangers in use, review of any applicable manufacturer's product information, and comparison with recommendations of other authorities. The information presented in this activity is not meant to serve as a guideline for patient management.

The Chairs and the Safety in Spine Surgery Project wish to thank the following companies for their generous support of this course.

Platinum Supporter

**Stryker**

Gold Supporter

**Medtronic**

Bronze Supporters

**OrthoPediatrics**

**ZimVie**

## Disclosure of Conflicts of Interest

Medical Education Resources ensures balance, independence, objectivity, and scientific rigor in all our educational activities. In accordance with this policy, MER identifies conflicts of interest with its instructors, content managers, and other individuals who are in a position to control the content of an activity. Conflicts are resolved by MER to ensure that all scientific research referred to, reported, or used in a continuing education activity conforms to the generally accepted standards of experimental design, data collection, and analysis. MER is committed to providing its learners with high-quality activities that promote improvements or quality in health care and not the business interest of a commercial interest.
