Optional—Experiential Training Pre-Course

Take the next step with this ½ day optional pre-course of experiential training sessions addressing safety issues. Come learn what the experts know after 200+ patient safety program implementations. You'll leave equipped with proven, practical action steps for creating and implementing the three critical components of an effective spine surgery safety program.

► **THURSDAY, MARCH 12, 2020**

Warwick Hotel, New York, NY

Optional—Experiential Training Pre-Course

12:00 PM	Registration & Lunch
12:30	Was It Really a Miracle? What Patient Safety Leaders Must Learn from Capt. Sully. An interactive and dynamic presentation that explores the lessons learned from Capt. Sully's unprecedented ditching in the Hudson River. This deep dive into the "Miracle on the Hudson" will provide participants with an understanding of the three critical components of every effective patient safety program.
1:45	Break
2:00	A Check Up for Your Checklists: Why Your Checklists Aren't Really Working and What to Do About It This experiential workshop will provide the underlying methodology that powers effective checklists and equip participants with the tools to analyze their own checklists against best practices. Participants will learn exactly what revisions must be made to their current checklists and know the best strategies to implement those changes.
2:35	Overcoming the Culture of Silence: Why Your Teams Won't Speak Up for Safety and How to Change This Behavior This workshop digs deeply into the data around the failure to "stop the line" for patient safety (especially on surgical teams) and reveals why true safety is impossible without fixing this. Participants will be equipped with seven action steps crucial to creating a culture of accountability among their spine surgery teams.
3:15	Break
3:30	If You Want a Safer Team, You Must Be a Better Leader: Critical Change Management Skills Every Leader Must Have This interactive session explores the connection between leadership actions and the success of patient safety initiatives. Participants will be equipped with an assessment tool to evaluate their own leadership actions and to predict the success of their safety journey in spine surgery.
4:30	Adjourn
